Our approach to Values-Based Investing

PEOPLE
Every Single Person

PLACES
Every Square Inch

Eliminate

companies whose products or practices cause harm

Evaluate

companies to identify those that meet our investment objectives

Elevate

companies who make the world a better place

Reference to OneAscent's values-based investing approach is provided for illustrative purposes only and indicates a general framework of guiding principles that inform OneAscent's overall research process. OneAscent's judgment about the quality, alignment, or impact of a particular company may prove to be incorrect. There is no guarantee that any investment will achieve its objectives, generate positive returns, or avoid losses.

Navigating the “ups” and “downs” of the market

STRATEGIC “The Roadmap”

- Set annually
- Determined by capital market assumptions
- Risk-based market exposure

TACTICAL “The Navigation”

- Updated monthly
- Objective assessment of the health of global markets
- Behavioral alpha, risk-mitigation

Navigating the “ups” and “downs” of the market

Allocation Committee Update & Outlook Q3 2022

Nathan Willis, CFA, CAIA

Director of Portfolio Strategy
OneAscent Investments

Q2 2022 market discussion

- Review of markets in the second quarter
- Navigator process and investment outlook
- What actions should I be taking in my portfolio

Valuations – historical context

Source: FactSet, FRB, Refinitiv Datastream, Robert Shiller, Standard & Poor's, Thomson Reuters, J.P. Morgan Asset Management. Price-to-earnings is price divided by consensus analyst estimates of earnings per share for the next 12 months as provided by IBES since June 1997 and by FactSet since January 2022. Current next 12-months consensus earnings estimates are \$240. Average P/E and standard deviations are calculated using 25 years of history. Shiller's P/E uses trailing 10-years of inflation-adjusted earnings as reported by companies. Dividend yield is calculated as the next 12-months consensus dividend divided by most recent price. Price-to-book ratio is the price divided by book value per share. Price-to-cash flow is price divided by NTM cash flow. EY minus Baa yield is the forward earnings yield (consensus analyst estimates of EPS over the next 12 months divided by price) minus the Moody's Baa seasoned corporate bond yield. Std. dev. over-/under-valued is calculated using the average and standard deviation over 25 years for each measure. *P/CF is a 20-year average due to cash flow availability. *Guide to the Markets – U.S.* Data are as of June 30, 2022.

†Strategic allocations represent a majority of the portfolio and are updated annually based on capital market assumptions. The strategic component of a portfolio is intended to provide the appropriate level of market exposure to stocks and bonds based on the intended risk-tolerance.

‡Tactical allocations represent a smaller portion of the portfolio and are updated quarterly based on an assessment of relative strength. The tactical component of a portfolio is intended to capitalize on near-term opportunities as the market environment changes.

Important Disclosures

OneAscent Investment Solutions LLC (“OneAscent”) was formed in March 2017, and manages a variety of equity, income and balanced asset strategies for client accounts. OneAscent is an investment adviser registered with the United States Securities and Exchange Commission. Registration as an investment adviser does not imply any certain degree of skill or training. OneAscent's Form ADV Part 2A is available on its website, www.oneascent.com, or the SEC's website, at www.adviserinfo.sec.gov, or by contacting the firm. Please consult OneAscent's Form ADV Part 2A for information regarding account minimums and fees.

This material is intended to be educational in nature, and not as a recommendation of any particular strategy, approach, product or concept for any particular advisor. These materials are not intended as any form of substitute for individualized investment advice. The discussion is general in nature, and therefore not intended to recommend or endorse any asset class, security, or technical aspect of any security.

The strategy is not necessarily appropriate for any particular client or investor. Accordingly, any reader of the attached description should not interpret the attached as investment advice. All investments bear a risk of loss, including the loss of principal that the investor should be prepared to bear. The use of any chart or graph in the attached is not intended to be viewed as a singular aid in determining investment strategy. Such visual aids are instead intended as a complement to other data, and like such other data, should be considered in light of consultations with professional investment tax and legal advisors. Past performance may not be indicative of future results. No current or prospective client should assume that the future performance of any specific investment, investment strategy (including investments and/or investment strategies recommended by the adviser), will be equal to past performance levels. Indices are reported to give a point of comparison only. An investor may not invest directly in an index. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment will either be suitable or profitable for a client's investment portfolio.

Important Disclosures

Turnkey Model Performance:

Performance information for the attached strategy is calculated using model performance and is based on the portfolio allocation data since inception. The strategy has not materially changed since inception. Model performance is net of any fees on the underlying mutual funds and ETFs, management fees of any underlying model portfolios, and a strategist fee applied annually to the entire strategy. The model performance does not include any overlay fees, brokerage fees, or commissions. Performance for periods longer than a year has been annualized. Model performance means that while actual client accounts will be managed as closely to the model as possible, the performance reported is for the targeted portfolio allocations for the strategy and not a composite of actual client accounts. Accordingly, individual client performance may vary according to various factors, including fee arrangements, withdrawals, contributions, and tax considerations, among other factors. OneAscent does not control the fee amounts charged by recommending advisers. A complete listing of all trades in the model, as well as a full description of the model/strategy are available upon request.

Unless otherwise noted, the benchmark used for this strategy is a blend of four broad based market indices and benchmark performance is calculated by Morningstar. Blended benchmarks are rebalanced back to their target weights each calendar quarter. The four broad market indices are S&P 500, Russell 2500, MSCI ACWI ex USA, and Bloomberg Barclays US Aggregate Bond. The S&P 500 is a market cap-weighted index of the 500 largest U.S. publicly traded companies. The Russell 2500 is a market cap-weighted index that includes the smallest 2,500 companies covered in the Russell 3000 universe of U.S. companies. The MSCI ACWI ex USA (Morgan Stanley Capital International All Country World Index Ex-U.S.) is a market-cap weighted index designed to provide a broad measure of stock performance throughout the world, with the exception of U.S.-based companies. The Bloomberg Barclays US Aggregate Bond is an index designed to provide a broad measure of the U.S. bond market and includes government securities, mortgage-backed securities (MBS), asset-backed securities (ABS), and corporate securities. Index performance is for illustrative purposes only. Index performance does not reflect any management fees, transaction costs, or expenses. Indexes are unmanaged and one cannot invest directly in an index.
